DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The rejection of claim 20 under 35 U.S.C. 112, second paragraph, is withdrawn in view of Applicant's amendments.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 17-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Carey et al. (US 6280813).

Carey et al. disclose a magnetic recording medium having bottom magnetic layer and a top magnetic layer (see Fig. 1, 3, 4). Figure 3 shows the Co coupling intensifying regions between the coupling layer and each of the magnetic layers. As shown in Figure 4, a recording field applied from a magnetic head within the range of $-2000 < H < 2000$ results in a recording medium having magnetic layers with anti-parallel magnetizations.

Allowable Subject Matter

4. Claims 22-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments filed 10/4/04 have been fully considered but they are not persuasive.

Applicant argues that Carey et al. fail to teach or suggest the claim limitation directed to a magnetic recording medium wherein the first and second magnetic layers thereof are maintained in *either* a first antiparallel state or a second antiparallel state.

The Examiner maintains the position that Carey et al. meet this limitation. It appears that what Applicant is really talking about is how the medium behaves when different fields are applied (i.e., when the applied field is smaller than the switching field as noted in the parent application in col. 11, lines 45-50). However, all the claims require is the the first and second magnetic layer are maintained in *either* on antiparallel state or another which is clearly shown by Carey et al. in multiple places in the hysteresis graph shown in Fig 4 of that patent (H=0Oe for example).

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1773

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
